A100

Commercial atmospheric water generator · technical reference

Rated production	100 L/day at 30°C / 80% RH
Water storage	60 L total in supplied product sheet
Dispensing	Ambient water; outlet-temperature customization by inquiry
Dimensions / weight	610 × 665 × 1330 mm / 95 kg net
Water-making power	1300W in supplied product sheet
Electrical reference	AC 220V / 50Hz in the supplied sheet; Hawaii electrical configuration must be confirmed
Filter reference	SFT + PPF + GAC + RO + T33 + LED-UV; stainless-steel air filter
Controls	Touch panel, filter-life reminder, internal UV and water-circulation reference

Rated capacity is specified at 30°C / 86°F and 80% relative humidity. Actual production depends on temperature, humidity, airflow and use. Reference specifications do not constitute a site output guarantee.

Configuration review

Source materials describe different refrigerant and energy-use values. Confirm the actual refrigerant, voltage, frequency, water treatment, measured operating cost and service arrangement for each proposal. Historical supplier prices and performance claims are not included.

Confirm the exact model, nameplate, electrical supply, filtration revision, current availability and service terms with AquaAloha before ordering or operating equipment.
