Custom layouts & concepts

Supplied equipment views, engineering references and development concepts

Vehicle-specific equipment

Low-profile RV / heavy-truck equipment reference. Confirm vehicle envelope, mounting, vibration protection, ventilation, weather protection and power. This photograph is not a dimensioned installation approval.

Staff card-access dispensing

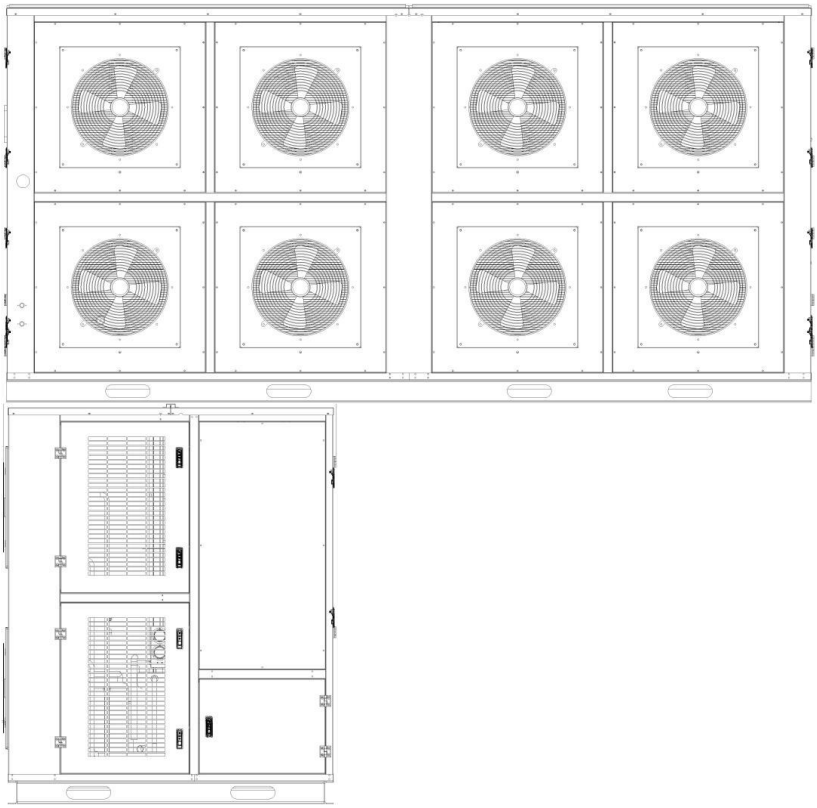

Supplied card-access equipment reference. Card readers and access controls are configured per project; this does not establish a validated US payment integration.

Solar & engineering references

Solar, power equipment, atmospheric-water modules and water-storage concept. Size generation, batteries and storage around verified site climate, demand and electrical load; the concept does not establish runtime or off-grid autonomy.

A5000 front & side views

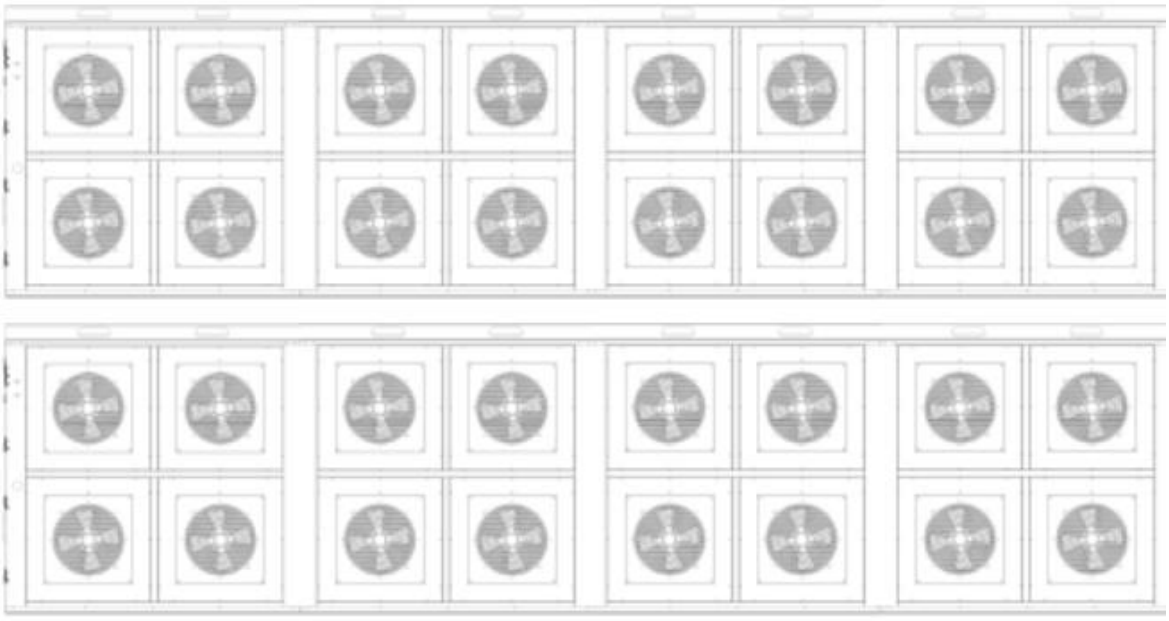

Original engineering views from the supplied brochure. Final dimensional drawings, clearances and equipment configuration require project confirmation.

Development concepts

Reference	Information supplied	Confirmation needed
A20 Desktop	Desktop 20 L model designation and exterior view	Daily rating and conditions, power, filtration, dimensions, net weight and current availability
A50 DC	24V DC; 50 L model designation and exterior view	Operating current, input power, daily rating and conditions, dimensions, net weight and availability
A20000 Water Station	20,000 L designation and multi-module drawing	Daily test conditions, power, footprint, weight, storage, installation and availability

A20000 multi-module drawing

These development-overview concepts are separate from the documented floor-standing A20, A3000 proposal and A5000 configuration. Do not infer missing specifications by scaling another machine.

Equipment photographs and concept drawings are supplied design references, not AquaAloha installation case studies. Product display cutouts are prepared for web presentation and are not engineering drawings.

Confirm the ordered model, electrical nameplate, filtration revision, installation and current availability with AquaAloha before procurement.
